Dear citizens of Zagreb!
Dear visitors!

We are pleased to present the fifth edition of the Zagreb in Figures publication. This statistical publication presents key data and facts about the City of Zagreb in an interesting and reader-friendly way.

If you are interested in the population of the City of Zagreb, its economy, education, labour market, geographical and climate data, culture and leisure or other topics, Zagreb in Figures 2022 will provide you with more information about our city. It contains the following seven chapters: Population, Geographical and Climate Data, Culture and Entertainment, Education, Economy, Transport, Politics and Public Administration and a historical retrospective of the City of Zagreb.

This edition outlines the impact the health crisis arising from the Covid-19 pandemic which led to many negative trends in 2021 in many areas of life. For example, this impact can be observed in the 10.3% increase in the number of deaths compared to 2020, the decline in the number of visitors to cultural institutions – 65.9% for theatres, the decrease in the number of users of public transportation – 9.2% for trams and buses individually, and the 18.9% increase in the number of unemployed persons compared to 2020. These indicators are therefore to be interpreted in the light of this great change.

The gradual loosening of epidemiological measures in 2021 led to some positive trends when it comes to both professional life and private events such as weddings and births. In 2021, the number of live births increased by 2.1%, with an average maternal age of 31.4 years, and the number of marriages increased by 28.3% compared to 2020. In the tourism sector, a 76.3% increase in the number of overnight stays can be observed, most of which came from German tourists, whose number increased by 92.1% compared to 2020.

Finally, the most important information provided by this data is that Zagreb is an ever-changing city. On the one hand, it is a dynamic metropolis; on the other hand, it is what it has always been — an attractive city suitable for comfortable living.

We hope that Zagreb in Figures 2022 will spark your interest and that this publication will prove to be useful in your professional and everyday life.
